mimeo

Mimeo simplifies the complexities of content distribution and printing.

Content Accountability
Know who is seeing what content, when and why. Asset management is at the core of Mimeo's platform. Gain control and intelligence over your content through this centralized tool. Complexity now becomes simplification.

Spend Management
Automation and spend management should go hand in hand. With Mimeo, they do. Specify ordering limits, budgets, and more. Access robust reporting to gain further insight into costs. You have complete control over every order at your enterprise.

Process Improvement
Give your employees back their time. Quicken the speed of building, proofing, and distributing documents through a single content repository. Eliminate obsolescence by seamlessly keeping your content up to date.

Permissions
Through different user roles, set permissions for those accessing your organization's content. Specify who can share what and limit who cannot.
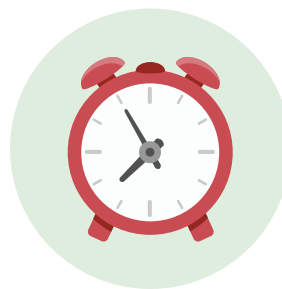

How Does Mimeo Work?

Distribute digital content. Print, when you need it.

Upload your content then build and proof in minutes

Place order for one or multiple locations

Orders placed by 10PM EST arrive 8AM next morning

Mimeo handles all logistics and distribution
